INNOVATION PROGRAM FACTORY OF THE FUTURE

K3D-AddFab 3dmetalsfabricated

A 3D metal printing technology and expertise centre where further steps are being taken towards the industrialisation of 3D metal printing

- ▶ Industrialisation
- ▶ Quality management
- ▶ Industrial applications

WHAT WE DO

K3D-AddFab works with participating companies and educational institution(s) to advance 3D metal print technology. K3D-AddFab's ambition is the further development of a wide range of high-tech and high-end production applications for 3D metal printing for industrial series production, and to upscale the capacity for high-quality applications. K3D-AddFab will be a print and expertise centre, with state-of-the-art machines and facilities, where further steps in the industrialisation of 3D metal printing will be achieved through an innovation programme in the aforementioned areas.

The collaboration will be an example of open innovative collaboration and knowledge enhancement in the field of next-generation printed metal products. This expertise will be brought together in the new centre to be developed on the Brainport Industries Campus.

WHAT YOU CAN DO

K3D-AddFab invites parties who are willing and able to participate in the open and innovative culture of the factory of the future. Partners must have both something that they wish to contribute and something that they wish to get out of the centre. For a technology company that could be, for example, resources and time to experiment and demonstrate together. For manufacturing companies, that could be time and use cases with specific requirements.

MORE INFO?

If you have any questions or interest in participating, please drop by or get in contact with us. K3D-AddFab is currently located at Strijp-T in Eindhoven, but as of 1 March 2020 we will move to the Brainport Industries Campus. You can contact us via info@k3d.nl or 0315 – 33 94 32. More information is also available at www.k3d.nl.
